

CURRICULUM VITAE  
of  
DAVID WILLIAM KNOWLES

Life Sciences Division,  
Lawrence Berkeley National Laboratory  
University of California  
84R0171, 1 Cyclotron Road, Berkeley, CA 94720  
510-486-6082  
DWKnowles@lbl.gov  
<http://dwknowles.lbl.gov/>  
<http://big.lbl.gov/>

**Education:**

**Ph.D., 1992,** Physics, University of British Columbia, BC, Canada  
**B.Sc.-Honours, 1982,** Physics, University of New South Wales, Australia  
**1976,** Sydney Grammar School, NSW, Australia

**Experience:**

**Biophysicist, Scientist**

Lawrence Berkeley National Laboratory, Berkeley, CA 1999 – present

**Post Doctoral Fellow**

Lawrence Berkeley National Laboratory, Berkeley, CA 1994 – 1998

**Physics Instructor**

Physics Dept., University College of the Cariboo, Kamloops B.C. 1993

**Sessional Lecturer**

Physics Dept., University of British Columbia, Vancouver, Canada 1992

**Graduate Student**

Physics Dept., University of British Columbia, Vancouver, Canada 1987 – 1992

**Awards and Honors:**

Recipient, NIH, GMS R01 Competitive Renewal Award #1R01GM085298	2014 – 2017
Recipient, National Institutes of Health, GMS Award #1 R01 GM085298-01A1	2010 – 2014
Recipient, National Institutes of Health, NCI Award #1 R33 CA118479-01	2006 – 2010
Member, Breast Oncology Research Program, UCSF, San Francisco, CA,	2004 – present
Recipient, Breast Cancer Research Program Idea Award #DAMD170210440	2003 – 2006
Recipient, Graduate Scholarship, School of Physics, UBC, BC, Canada	1987 – 1992

**Invited Talks:**

**2011, Invited Book Chapter, David W. Knowles,** *Three-dimensional morphology and gene expression mapping for the Drosophila blastoderm.* In: *Imaging in Developmental Biology*. Ed. James Sharpe and Rachel O. Wong. Cold Spring Harbor Laboratory Press.

**May 9-12, 2010 Invited Speaker,** A 3D cellular gene expression atlas for *Drosophila* embryogenesis, at HHMI Janelia Farm Conference: Turning Images to Knowledge

**21st Feb 2007, Invited Speaker,** UCSF Biological Imaging Development Center *Three-dimensional morphology and gene expression in the Drosophila blastoderm at cellular resolution.*

**7th Feb 2007, Invited Speaker,** UCSF Comprehensive Cancer Center: Breast Oncology Program.  
*Novel Image-based Screen of Mammary Tumors*

**April 2006, Invited Speaker,** Basic Medical Sciences Departmental Seminar Series, Purdue University  
*Novel Image-based Screen of Mammary Tumors*

**October 2005,** Genome Informatics, Cold Spring Harbor, New York, Invited Speaker, *Berkeley Drosophila transcription network project: 3D blastoderm gene expression atlas*

**8th August 2005,** IEEE Computational Systems Bioinformatics Conference August 8-11, Stanford University. **Invited tutorial speaker:** *Novel Visualization and Quantitative Analysis Methods in Bioluminescence*

**Service:**

**Scientific Study Section Review Panel Adhoc Member:** NIH, NCI, Innovative Molecular Analysis Technologies (IMAT). 2000-present

**Program Committee Member:** Workshop on Multiscale Biological Imaging, Data Mining & Informatics, Santa Barbara, CA, USA, Sept 7-8, 2006

**Instructor:** Optical Microscopy, Life Sciences Division, LBNL 2002-present

**Scientific Reviewer:** multiple journals, Bioinformatics, Nature Reviews, ..

**Middle School Instructor:** Physics for 5th Grade

**Instructor,** Daughters and Sons to Work, LBNL, 2003, 2004

**Lecturer,** Friends of LBNL, 2005

**Lecturer,** Center for Science & Engineering Education, at Elizabeth Elementary School and George Washington High School. 2003

**Building Manager and Safety Coordinator (Bld74 & 84),** Lawrence Berkeley National Lab, 1999 - present.

**LSD EH&S Committee Member,** 2006- present

**Post Doctoral Research:**

As postdoctoral fellow I developing an image-based microrheology experiment where a controlled deformation was applied to the cytoskeleton of human red blood cells and the resulting reorganization of fluorescently labeled membrane components measured. Using this technique, I showed that vesiculation in red cells involves the uncoupling of the cytoskeleton from the lipid bilayer and this process provides an effective mechanism for selectively sorting and trafficking membrane proteins [Knowles et al. 1997]. I also used the techniques to reveal dynamical properties of the water-channel protein [Cho et al. 1998] and the ion channel Band 3 [Van Dort et al. 2001].

**Ph.D. Research:**

For my Ph.D. I build a fluorescence recovery after photobleaching experiment to measure the *in situ* lateral diffusivity of specific membrane components of the human red blood cell. The work revealed a cooperative action between membrane receptor-proteins which resulted in the transduction of a mechanical signal from outside to inside of a cell causing increased rigidity of the cell's cytoskeleton [Knowles et al. 1994]. The idea that transmembrane proteins profoundly influence the rigidity of the skeletal-network was used to elude a mutation in band 3 responsible for the red blood cell disorder South Asian Ovalocytosis, which because of increased membrane rigidity is resistant to invasion by malaria parasites [Mohandas et al. 1992].
